

AN ACQP FOUNDATION CAMPAIGN

REPAIR OUR WORKFORCE

**Healthy working lives.
A fairer route to retirement.**

Joint, back and muscle problems should not define a construction career.

Support the people who build our future.

The physical demands of construction can take their toll long before retirement. The ACQP Foundation is calling for practical action on prevention, earlier assessment and timely access to appropriate musculoskeletal care.

01

Prevent problems

Better working practices and occupational-health support throughout a construction career.

02

Get support earlier

Timely assessment and access to physiotherapy or treatment where clinically appropriate.

03

Work together

Bring government, employers, workers and healthcare partners into a practical conversation.

Help us repair our workforce.

Share your experience. Support the campaign.
